EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: On page 1, line 4 of the specification, after "10/302,004", the phrase -- now U.S. Patent No. 6,982,113 -- has been inserted in order to update the continuity of this applicant.

2. The following is an examiner's statement of reasons for allowance: The claimed invention is deemed allowable in view of the applicants' arguments filed June 27, 2005 since the prior art fails to teach a inflatable article as recited containing the specific tie layer of claim 1, or the specific properties of the article of claims 2-9. There is no suggestion or motivation to substitute the tie layer as used by the applicant, which forms an article of the recited properties, since the prior art never contemplated forming cellular articles with superatmospheric pressures and only inflated the prior art cellular articles to 1 psi. The examiner is relying on the applicants' arguments on pages 13-21 in the response filed June 27, 2005.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
